RE: Site Inspection, Desmond Shields, Greenstone A & B Mine,  
S/003/018, Box Elder County, Utah

Date of Inspection: June 4, 1993  
Time of Inspection: 1540 - 1600  
Conditions: Overcast, windy  
Participants: Tony Gallegos, DOGM

Purpose of Inspection: To see if the site disturbance has changed.

The Division had received correspondence from Mr. Shields stating that he no longer held the claims for this area. He also claimed that the disturbance created at the site was not caused by him.

The site appears basically unchanged since my last visit. The mine waste dump area may have expanded. My reasoning for this is that there is no vegetation growing in one section of the dump, but there is some vegetation growing on other portions of the same type of dump material. There may have been some new small excavations created within the pit area. These excavations were probably created by rock hounds. Photographs were taken to document the status of the site.

By reviewing previous dump photographs at the office, it appears that the dump has not changed significantly since the last inspection.
